

PAINT PRODUCT RANGE

AEROSOL SPRAY CANS – for the Flower, Hobby, Arts & Crafts

Clarke Colours range of paints was initially formulated to be soft and gentle enough to be used on floral arrangements to brighten and beautify their blooms. Our Fluorescent, Pastel and Brilliant colours are therefore safe to be used on fresh and dried flowers, polystyrene, plastics, wood, etc.

The flower sprays are exceptionally quick drying, and produce a most attractive finish on virtually any surface.

Our spray paints are particularly recommended for use on polystyrene and in the arts and crafts environment. To apply, spray with the can approximately 35cm the surface to be painted. Move the can gently and smoothly to-and-fro and build up successive coats of paint.

Note: To prevent blockage in the nozzle, and ensure trouble free repeat usage; invert the can and spray for a few seconds to clear the valve and nozzle after use.

For available colours see the Colour Chart on the reverse side.

PETAL PAINTS - for Commercial or Compressor applied Purposes

Clarke's paint formula is also available in 1Lt and 5Lt liquid packs. This product is sold as our "Petal Paint" range. These 1Lt and 5Lt quantities allow for application by compressor driven spray guns, or other similar large or commercial scale environments and/or applications on fresh and dried flowers, polystyrene, plastics, wood, etc.

Petal paint is supplied in our range of Brilliant, Pastel and Fluorescent colours. Petal Paint is a quick drying formula and produce a most attractive finish on virtually all surfaces.

This paint is particularly recommended for use on polystyrene in the shop display and show stand environments.

Available in more than 60 colours - see the Colour Chart on reverse.

SUNDRY PRODUCTS

Christmas Snow

A bright white, gentle snow spray for all year round decorating. Great for shop-front displays and sprayed on glass windows not to mention applied to Christmas trees at the festive season.
