## DYES

Clarke Colours dyes are specially formulated for dyeing fresh and glycerine dried flowers and foliage. The dyes are easily used for a variety of other applications such as coral, wood, wicker work etc. and produce clean, clear and attractive finishes.

Dyes are available in both single and double strengths. The results obtained will depend on dilution of the dye, the water quality and the nature of material being dyed. Hot solutions of dye may improve colour in certain instances. For specific species of grasses and flowers the quantity of dye and drying time may be required to be reduced.

## PLANT RELATED PRODUCTS

### Leafgloss

Leafgloss cleans and produces a high, dust-free gloss on hard and soft leaved plants. Leafgloss also has a protective function against some common insect pests. Examples of plants that benefit from the use of leafgloss include rubber plants, xanthiums, philodendrons, delicious monsters, etc. Leafgloss is packed as an aerosol to ensure ease of application.

### Leafglow

Leafglow has the identical attributes as leafgloss but is presented as a cream formulation and can be applied by hand.

### Clearset

A clear spray designed to delay the opening of blossoms. This product can also be used as a fixative for decorations.

### Glycerine

Clarke Colours Natural pure glycerine is developed to assist with the drying of flowers and foliage. Our Glycerine comes in 1Kg and 5Kg packs.

Glycerine is hygroscopic and is a great solvent. This makes it a good product for cleaning and stain removal. Glycerine can soften hardened and set stains, so that even old stains can be more easily removed.

## FLOWER PAINTS

For our range of flower paints see the Paint section of this catalogue.
